## Experience

### Unified Infotech | Software Engineer

*November 2023 - Present*

- Worked in Boards&Beyond website being used by 1 lakh+ American medical aspirants for McGrawHill client.
- Part of a big functional release and majorly contributed in the frontend part of the release.
- Took sole responsibility for migrating project from Angular 9 to Angular 14.
- Excessive use of JIRA, GIT and Github.
- Worked with a 10-member team of developers to ensure continuous uptime and enhancement of the application.
- Took interviews for the company to recruit new frontend developers up to senior developer roles.

### ForgeAhead Solutions | Software Engineer

*August 2022 – October 2023*

- Worked in Angular and added a lot of features in a one-year-old application.
- Revamped the code with new standards and migrated from Angular 12 to Angular 14.
- Excessive use of JIRA, GIT and Bitbucket.
- Being the sole frontend developer, responsible for overseeing all frontend work.

### CitiusTech | Software Engineer

*October 2021 - July 2022*

- Worked in Angular in a project, with scratch development with a potential userbase of 1 lakh+ users.
- Excessive use of JIRA, GIT and Bitbucket.
- Was responsible for handling frontend designs and guiding trainees.

### Wipro Technologies | Software Engineer

*June 2019 - October 2021*

- Worked as a frontend engineer managing website with 10k+ users for Shell Petroleum.
- Managed and worked on UI enhancement written in HTML, SCSS and Angular.
- Involved in 4 enhancement activities for the applications.
