- Worked on fetching and updating data, debugging using SQL queries.
- Involved in 4 enhancement activities for the applications.

### Projects

#### TO-DO | Self ([link](#))

May 2022 - June 2022

This is a to-do list built with Angular, and is fully responsive. This app uses local storage of website to store the to-dos, so that it is present every time the user comes to the website using same browser.

#### Delicious Restaurant | Self ([link](#))

March 2022 - April 2022

This is a Restaurant Website built with HTML and Bootstrap. This is a completely responsive UI and adjusts itself for every screen, whether mobile or tablet or desktop.

#### Countdown Timer | Self ([link](#))

January 2022 - February 2022

This is a simple countdown timer, built with HTML, CSS and JavaScript. This is fully responsive for all devices and can be used to count down to any future date, such as New Year or any special date. It can be integrated as a part of other websites also.

#### Responsive Calculator | Self ([link](#))

June 2021 - July 2021

This is a fully functional calculator, with fully responsive UI. This is built using HTML, CSS and JavaScript.

#### Guess My Number | Self ([link](#))

June 2021 - July 2021

This is a **guess the number** game. The score starts from 20 and keeps on decreasing till the player doesn't guesses the correct number. When he guesses the correct number, the final score freezes. Also, if he is not able to guess the number in 20 tries, he loses the game and the screen changes accordingly.
