Profile Summary

Frontend Developer with 7+ years of experience building scalable web applications using Angular & React. Skilled in building responsive websites and leading frontend initiatives across banking, healthcare, education, and energy domains. Especially known for clean code, code upgradability and performance optimizations.

Education

Year	Degree/Examination	Institution/Board	CGPA/Percentage
2019	Bachelor of Engineering	Institute of Engineering and Management	8.0/10.0
2014	Intermediate (Class XII)	The Sapience School	81.0%
2012	Matriculation (Class X)	The Sapience School	9.8/10.0

Experience

Bounteous x Accolite | Associate Technical Manager

April 2025 – Present

Client : Goldman Sachs (Banking)

- Worked for Record Retention team of Goldman Sachs, having 12 Petabytes of data.
- Took additional courses for learning ServiceNow.
- Worked on developing ServiceNow UI from scratch for a revamped new project.
- Took 200+ interviews for the company to recruit new frontend developers up to lead developer roles.
- Added batching in couple of complex multi-party APIs reducing their response time from 1 minute to 10 seconds in a Spring Application using AI, resulting in huge downstream performance.
- Optimized a lot of React components with the additional use of AI.
- Got award from my parent company Bounteous for exceptional performance in project.

Unified Infotech | Senior Software Engineer

November 2023 – March 2025

Client : McGrawHill (Education)

- Worked in Boards&Beyond website being used by 1 lakh+ American medical aspirants for McGrawHill client.
- Completed a big functional release for integrating Boards&Beyond website into the whole suite of McGrawHill after the acquisition including the login migration.
- Took sole responsibility for migrating project from Angular 9 to Angular 14.
- Wrote unit tests for the developed functionality in Jasmine.

ForgeAhead Solutions | Software Engineer

August 2022 – October 2023

Client : Own product (Contrext)

- Worked on a document signing project enabling users to sign PDF documents.
- Revamped the code with new standards and migrated from Angular 12 to Angular 14.
- Being the sole frontend developer in a 5 member team, responsible for overseeing all frontend work.

CitiusTech Healthcare | Software Engineer

October 2021 - July 2022

Client : Logibec Espresso (HealthCare)

- An application for Canadian nurses to see their shift timings, extra pays, etc.
- Revamped a very old UI project with 10000+ users in a strict timeline of 6 months.

Wipro Technologies (Shell Petroleum) | Software Engineer

June 2019 - October 2021

Client : Shell Petroleum (Energy)

- Worked as a frontend engineer managing website with 10k+ users for Shell Petroleum using Angular.
- Learnt the fundamentals of Software Engineering.
